PROFESSIONAL SUMMARY

Full Stack Developer and Computer Science Engineer (ESPRIT) with hands-on experience building and deploying production web platforms end to end, from UI to database and infrastructure. Currently based in Kuwait, developing SaaS and corporate web applications with Next.js, React, Node.js/Express and MongoDB, containerized with Docker. Background spans Angular, .NET Core, CI/CD and DevOps tooling, and AI-powered features, with international experience across Kuwait, France, Canada and Tunisia. Focused on clean architecture, performance and delivering reliable products.

PROFESSIONAL EXPERIENCE

Takween — Full Stack Developer **Jun 2026 – Present**

Kuwait City, Kuwait · HSSE training & compliance provider

- **Corporate website:** Designed and developed from scratch, with ReactJS, the website of Takween (takween.com.kw), a training provider specialized in HSSE (Health, Safety, Security & Environment) training and compliance.
- Showcased the company's training programs and courses, services and contact channels to help organizations find and request the right trainings for their teams.
- Delivered a responsive, reusable component-based UI with SEO metadata and performance optimization.
- **Mustawfi SaaS platform:** Developing Mustawfi (mustawfi.com), a bilingual (Arabic/English, RTL/LTR) SaaS platform for digital audits, checklists, reporting and online payment.
- Built the frontend with Next.js (server-side rendering, routing, i18n) and the backend REST API with Express and MongoDB.
- Integrated online payment for platform subscriptions and services.
- Implemented multi-role access control (Business Owner, Manager, Auditor) with JWT authentication and granular permissions across multiple locations.
- Developed a dynamic drag-and-drop checklist builder, audit workflows and live performance dashboards turning audit data into actionable insights.
- Containerized frontend, backend and database services with Docker / Docker Compose and managed deployment to production servers.

ITEC Études — Full Stack Developer (6-month mission) **Nov 2025 – Apr 2026**

France (Remote)

- Designed and implemented the backend architecture with Django and the frontend with Angular for a parking management web platform.
- Set up and optimized the PostgreSQL database (schema design, indexing, query optimization).
- Developed a client portal for viewing reports and company-generated statistics.
- Built a real-time interface displaying available and occupied parking spots; designed parking layout plans with Inkscape (SVG) integrated into the platform.

Freelance — Full Stack Developer (E-commerce Platform – plagediscount.com) **2026**

Remote · Client: French artisanal products company

- Designed and built a complete e-commerce platform (plagediscount.com) for selling artisanal products: catalog, categories, product pages, cart and order management.
- Developed the frontend with Angular and the backend REST API with Django; built an admin back-office to manage products, stock and orders.
- Deployed the application on a Hetzner cloud server using Docker, configured the reverse proxy, domain, SSL/HTTPS and production environment.

EY (Ernst & Young) — Full Stack Developer Intern (Final-Year Project) **Feb 2025 – Aug 2025**

Tunis, Tunisia

- Developed an intern management web application using .NET Core and Angular.
- Integrated an AI-based recommendation system to match interns with projects and mentors.
- Implemented automatic report generation with LaTeX and real-time notifications with SignalR.

IPACT Consult Inc. — Full Stack Developer Intern **Jun 2024 – Aug 2024**

Montréal, Québec, Canada (Remote)

- Contributed to Manajero, an agile management platform integrating Scrum practices and Test-Driven Development.

- Applied a full TDD workflow, writing JUnit unit and integration tests before feature implementation.
- Built dynamic user interfaces with Angular and secure REST APIs with Spring Boot.

ACADEMIC PROJECTS

E-Learning Platform — Angular, Spring Boot, MongoDB **Feb 2024 – May 2024**

- Built an e-learning platform with automated quiz generation and candidate–test matching algorithms; applied data mining to analyze course trends and predict student profiles.

DevOps & Microservices Project — Jenkins, Docker, Kubernetes **2023 – 2024**

- Built a CI/CD pipeline with Jenkins, Docker and Kubernetes, including SonarQube code analysis, JaCoCo coverage, Trivy security scanning and Nexus artifact management.
- Set up monitoring and alerting with Prometheus and Grafana; migrated a monolith to containerized microservices secured with Keycloak (SSO).

EDUCATION & TRAINING

Engineering Degree in Computer Science — ESPRIT **Sep 2020 – Oct 2025**
Tunis, Tunisia

Professional Training in Artificial Intelligence — Optimus Training (State-approved, ANETI) **Jan 2026 – Jun 2026**
Tunisia

- Artificial Intelligence, Data Science & Algorithms, Cybersecurity, Python, Java and JavaScript.

TECHNICAL SKILLS

Frontend: Angular, React.js, Next.js, JavaScript (ES6+), TypeScript, HTML5, CSS3, Tailwind CSS
Backend: .NET Core, Node.js, Express.js, Django, Spring Boot, Symfony, REST APIs, JWT, SignalR
Databases: MongoDB, PostgreSQL, MySQL, Microsoft SQL Server
DevOps & Cloud: Docker, Docker Compose, Kubernetes, Jenkins, CI/CD, Nginx, Hetzner Cloud, Linux, SonarQube, Nexus, Prometheus, Grafana
Languages: JavaScript, TypeScript, Python, Java, C#, C
AI & Data: Machine Learning, recommendation systems, Data Science, Hadoop, Spark, Hive
Testing & Tools: JUnit, Mockito, TDD, Git, GitHub, Jira, Maven, Figma, Inkscape

CERTIFICATIONS

- **Professional Training Certificate:** Artificial Intelligence — Optimus Training (Jun 2026)
- **TCF – Level B2 (CEFR):** French language — France Éducation International, Jan 2026 (View certificate)
- **CCNA:** Switching, Routing, and Wireless Essentials — Cisco (View credential on Credly)

LANGUAGES

Arabic: Native | **English:** Professional working proficiency | **French:** Upper-Intermediate (B2 – TCF)
